

Guessing Game One 🐢 🐢 🐢

Exercise 9 (and [Solution](#))

Generate a random number between 1 and 9 (including 1 and 9). Ask the user to guess the number, then tell them whether they guessed too low, too high, or exactly right. (*Hint: remember to use the user input lessons from the very [first exercise](#)*)

Extras:

- Keep the game going until the user types “exit”
- Keep track of how many guesses the user has taken, and when the game ends, print this out.
